

## **Proto Matrix Rail**

Taking over the field, the Proto Rail™ is your stepping stone to greatness. High-end performance in a durable and reliable setup, the Proto Rail™ is for the serious competitor. Featuring Boost™ Forward Technology, giving you a cushioned push on the ball and delayed bolt speed for increased air efficiency and high rate of fire.

### **REDESIGNED FOR 2010**

All new 3-D milling, color coded seals for simplified maintenance, and a host of other features make the 2010 Rail the gun of choice. The durable Rail™ solenoid features consistent airflow, and with a dwell of 18 milliseconds, you get super fast cycle speeds. The small, light Hyper3™ In-Line Air Regulator comes standard. The Hyper3™ regulator provides high flow and smooth velocity adjustment, with non-slip grip rings. The ultimate in ergonomic comfort, the Ultralite™ 45 Frame with fully adjustable trigger, comes standard on the Rail™. The solid construction consists of an aluminum body, bolt, Ultralite™ 45 Frame and trigger. We've designed the Rail™ with the goal of providing you with top-level performance at a reasonable price. Comes with a durable zippered gun case, parts kit, Dye Slick Lube, and 9-volt battery to keep your paintball gun of choice at its peak level. The Rail™ is available in Black, Camo, Claret, Clear and Airforce 1.

### **Features**

- 01 Two piece 14" Micro Honed proto barrel
- 02 New increased flow Hyper3™ in-line air regulator
- 03 Anti-chop break beam eye system
- 04 150psi Operating pressure with boost forward
- 05 Continuous 3d contoured body
- 06 Proto dual-density injection sticky grip
- 07 Led program control with 4 tournament modes
- 08 Ultralite™ ergonomic 45 frame
- 09 New solenoid with increased durability and flow
- 10 Ultralite™ aluminum trigger
- 11 Proto on/off airport
- 12 Adjustable clamping feedneck with thumbscrew
- 13 Compact and lightweight body styling
- 14 Metal eyeplates and back cap

BPS: 20+

Covered by one or more of the following U.S. Patents, 5,613,483; 5,967,133; 6,053,843 and 6,474,326

### **SLG Paintball Gun**

The SLG™ is the clear choice if you are looking for serious performance. Built on the patented Self-Closing Valve (SCV) Spool Platform, the Proto SLG™ paintball gun is constructed using a hybrid of aluminum and composite materials providing extreme durability and lightweight function. The streamlined two-piece bolt system operates at a low 145 psi. This low operating pressure results in superior accuracy, less paint breakage, and an impressive 1500 shots from a 68ci/4500psi tank.

Improved for 2010, the SLG™ now comes with color-coded o-rings for easy maintenance. Featuring a new smaller and lighter poppet solenoid, and a 320° degree Hyper3™ swivel.

Unmatched manufacturer support, continuous evolution of design, and meticulous engineering are just a few of the reasons that make Proto the first name in paintball.

Comes with a parts kit, Dye Slick Lube, and 9-volt battery to keep your paintball gun of choice at its peak level. The SLG™ is available in Clear, Blue, Olive, and Red.

#### Features

- 01 Compact and Lightweight single tube body styling
- 02 composite 45 frame
- 03 single piece micro honed proto barrel
- 04 anti-chop break beam eye system
- 05 increased flow hyper3™ in-line air regulator
- 06 proto bottom-line with dovetail
- 07 Bolt silencer, decreases noise and kick
- 08 super low 145 psi operating pressure
- 09 New Smaller and Lighter Poppet solenoid
- 10 Aluminum Blade trigger
- 11 Proto dual-density injection sticky grip
- 12 led Program Control with 4 Tournament Modes
- 13 orbital rotating sear reduces wear
- 14 no-rise clamping feed-neck
- 15 self-closing Valve Spool technology 2 piece bolt
- 16 self-lubricating force button

### **SLG UL Trigger**

Features smooth action and multiple adjustment points to help you find that perfect sweet spot.

### **Matrix Rail UL Trigger**

Features smooth action and multiple adjustment points to help you find that perfect sweet spot.

### **On/off airport**

Perfectly balanced twist on/off. Jewel logo insert. Precision machining. No tools needed. Finger twist on/off.

### **Slick Lube**

Now with a new formula better engineered specifically for paintball. A well-oiled marker goes the distance; so keep your marker properly lubed with the good stuff.

### **Dye Multi-Tool**

If MacGyver played paintball, this would be his tool. The new DYE Multi-Tool is loaded with various tools specific to the DYE and PROTO series of markers, all in one small, convenient package. Created to help you get out of any jam, or fix almost any problem with your DM series markers and not have to worry about losing that special tool. Our unique Multi-Tool works great with other markers too.

The DYE Multi-Tool contains a range of Allen keys: 1/4", 3/16", 5/32", 1/8", 3/32", 5/64", 1/16" and .05". Also features a small Phillips screwdriver to remove the board, a hex key to tighten your macro-line fittings, a flathead-screwdriver/bottle opener, small pocketknife, a straight O-ring pick and a 90° O-ring pick. There are even a few tools on there for our future items. Whatever your fix-it needs are, the new DYE Multi-Tool will have you covered.

### **Parts Kit**

What to do when you blow an O-ring? Maintain your marker with one of these repair kits.

1 Piece Barrels

Increasing your gun's performance is a must, and having an accurate barrel is number one. Proto barrels are made to the highest quality standards and are ultra accurate. Proto barrels are precision honed to a .690-micron tolerance. These barrels go through a five step honing and quality control process to ensure every one is as precise as we designed them to be. Made from lightweight aircraft grade quality 6061 T6 Aluminum for the perfect balance of weight and strength. Hard anodized color to match your style and also add a protective layer to your barrel for durability from scratches. Straight porting to keep your marker quiet and allow consistent airflow around the ball as it leaves the bore. Zero step diameter bore ensures consistent travel. Unlike most barrels, Proto barrels are 3D contoured, shaving off weight where you don't need it and reinforcing it where it needs to be for those dives into the snake. Available in 14" and 16" lengths. Available Threads: 98, A5, COCKER, IMPULSE, SPYDER

### **Tank Covers**

Proto brings you a smarter tank cover. This cover features zippered and locking Velcro closures, rubber polymer back to keep the tank in place, integrated swab holder and reinforced stitching. Featuring microinjected side logos with stability fins, compression foam to protect your tank from impact, and Proto sticky tack on the sides and top for added stability.

- 01 Rubberized back
- 02 Reinforced stitching
- 03 Proto Sticky tack
- 04 Microinjection logo & side fins
- 05 Heavy duty zipper
- 06 Velcro closure
- 07 Integrated swab sleeve

### **Pro Axis Goggle**

The Switch™ Axis™ Pro Goggle system is the premier goggle in the Switch™ line. Boasting soft compression formed earpieces, resulting in a lighter goggle. The patent pending 1/4 turn snap lock system is fast and secure, making lens changing simple. The outer frame holds the lens in place with no extruding edge or protruding tabs; just clean looking style. The inner frame structure provides a secure platform for the lens and frame to compress together, giving stability under the most severe of impacts. The split frame and lens is secured in place by right and left locking tabs. Once assembled, the split frame system holds your lens securely into place while providing comfort and style. The patent pending locking tabs allows you to change lenses in seconds. The Switch™ Axis™ Pro Goggle System comes standard with a clear tirodial thermal lens and a co-molded combination density mask for flex under play. The multi-ported earpiece allows unrestricted audible transfer to take place without sacrificing any ear protection and provides total comfort with two-layer foam. MAKE THE SWITCH™

Features

01 silicone woven rubber goggle strap designed to be adjusted to fit your head and remain fitted. Tiger tooth strap buckles will allow you to adjust your strap for a custom fit and will bite down to secure the strap. Just set it and forget it.

02 Compression formed soft earpieces with adjustable positioning allows you to customize the goggle for a lower profile fit. Makes the mask 20% lighter and also increase audible quality.

03 incredibly simple Patented 1/4 turn Switch™ Buckle Makes the hassle of changing lenses a thing of the past. Simply turn the locking tabs to unlock your lens frame. Pop out your old lens and drop in a new one.

04 The Switch™ lens is a tirodial lens giving the player the ultimate in vertical and horizontal peripheral vision. All Switch™ lenses have perfect optical clarity, setting the standard in visual performance.

05 multi-directional venting Drastically reduces any re-ventilated fogging, this will also throw your voice farther and clearer than any other vented mask on the field. The venting also assists in keeping you cool and breathing easy. The tested, proven and patented venting configuration will make communicating with your teammates effortless, as if there were no vocal obstructions.

06 DUAL-molded goggle system Designed to keep a rigid mount for the frame and lens while providing the softest facemask available. Paired with our multi-directional venting system, the dual-molded combination adds up to two levels of pliability. Designed with a pro-level low profile fit for a forgiving facemask, while still providing the safest eye protection system available.

DYE Precision, Inc. U.S. Patent #6,886,183 OTHER U.S. and International PATENTS PENDING.

Covered by one or more of the following U.S. Patents, #6,886,183

### **Pro Axis Goggle Color Kits**

Update the look of your Pro Axis Goggle System, with our new Limited Edition patterns. The new Hollywood and Enigma patterns let you express your inner style with matching goggle frame, strap and earpieces.

### **Switch FS Goggle**

The Switch™ FS Goggle System is revolutionary in its design and performance. The patent pending 1/4 turn snap lock system is fast and secure, making lens changing simple. The outer frame holds the lens in place with no extruding edge or protruding tabs; just clean looking style. The inner frame structure provides a secure platform for the lens and frame to compress together, giving stability under the most severe of impacts. The split frame and lens is secured in place by right and left locking tabs. Once assembled, the split frame system holds your lens securely into place while providing comfort and style. The patent pending locking tabs allows you to change lenses in seconds. The Switch™ FS System comes standard with an advanced tirodial anti-fog clear lens and a co-molded combination density mask for flex under play. The multi-ported earpiece allows unrestricted audible transfer to take place without sacrificing any ear protection and provides total comfort with two-layer foam. Sleek adjustable shade visor comes standard.

## Features

01 Switch™ visor Self-venting, low profile and removable. the Switch™ Visor is able to pivot up and down for easy lens replacement.

02 Advanced TIRODIAL anti-fog lens for optimal clarity. Giving you the ultimate in vertical and horizontal peripheral vision. All Switch™ lenses have perfect optical clarity, setting the standard in visual performance.

03 Incredibly simple Patented 1/4 turn buckle Makes the hassle of changing lenses a thing of the past. Simply turn the locking tabs to the right to unlock your lens frame. Pop out your old lens, drop a new one in, place the frame over the lens into position, and turn the tabs back again to lock it in.

04 Silicone woven rubber goggle strap designed to be adjusted to fit your head and stay there.

05 Tiger tooth strap buckle allows you to adjust your strap for a custom fit and will bite down to secure the strap. Just set it once.

06 Multi-ported earpiece Provides unrestricted audible transfer to take place without sacrificing any ear protection.

07 Unidirectional venting Drastically reduces re-ventilated fogging. The venting also assists in keeping you cool and breathing easy.

## **Switch EL Goggle**

The Switch™ EL™ Goggle System has the same great features as the FS™ system, but is slightly different in its design. The EL™ system comes standard with a solid one-piece facemask and a single pane fog resistant lens. Additionally, the single pane tirodial lens is treated with an exterior hard coat for abrasion resistance. The Switch™ EL™ system is available in Black and Woodland Camo.

## Features

01 Switch™ visor Self-venting, low profile and removable, the visor is able to pivot up and down for easy lens replacement.

02 Switch™ tirodial lens giving you the ultimate in vertical and horizontal peripheral vision. All Switch™ lenses have perfect optical clarity, setting the standard in visual performance.

03 simple PATENTED 1/4 turnbuckle making the hassle of changing lenses a thing of the past. Simply turn the locking tabs to the right to unlock your lens frame. Pop out your old lens, drop a new one in, place the frame over the lens into position, and turn the tabs back again to lock it in.

04 Silicone woven rubber goggle strap designed to be adjusted to fit your head and stay there.

05 Tiger tooth strap buckles allows you to adjust the strap for a custom fit and will bite down to secure the strap. Just set it and forget it.

06 Multi-ported earpieces providing unrestricted audible transfer to take place without sacrificing any ear protection.

07 One-piece Solid construction, the lightweight facemask protects you from paintball impacts.

08 Unidirectional venting Drastically reduces re-ventilated fogging. The venting also assists in keeping you cool and breathing easy.

DYE Precision, Inc. U.S. Patent #6,886,183 OTHER U.S. and International PATENTS PENDING.

Covered by one or more of the following U.S. Patents, #6,886,183

### **Switch FP Rental Goggle**

A rugged workhorse of the Proto line, the Switch™ FP Rental Goggle System comes standard with a solid one-piece facemask and a single pane fog resistant lens. An integrated visor prevents scratched lenses even under the toughest abuse by keeping the lens elevated from the ground. Additionally, the single lens is treated with an exterior hard coat for abrasion resistance. In the eventual need to change a lens, it has never been simpler or easier with our 1/4 turn quick lens change. A single stage comfort-fit foam makes for easy, comfortable wear. Closed cell foam makes it a snap to clean. Now available in 5 colors. You can keep groups separated or together with colored goggles, or help your referees stand out.

#### Features

- 01 Integrated Low profile visor Protects the lens from scratching when laid face down.
- 02 Switch™ tirodial lens giving you the ultimate in vertical and horizontal peripheral vision. All Switch™ lenses have perfect optical clarity, setting the standard in visual performance.
- 03 Incredibly simple Patented 1/4 turnbuckle making the hassle of changing lenses a thing of the past. Simply turn the locking tabs to the right to unlock your lens frame. Pop out your old lens, drop a new one in, place the frame over the lens into position, and turn the tabs back again to lock it in.
- 04 Silicone woven rubber goggle strap designed to be adjusted to fit your head and stay there.
- 05 Tiger tooth strap buckles allowing you to adjust your strap for a custom fit and will bite down to secure the strap. Just set it once.
- 06 Closed cell frame foam for a more durable and longer lasting rental goggle.
- 07 Unidirectional venting Drastically reduces re-ventilated fogging. The venting also assists in keeping you cool and breathing easy.
- 08 Multi-ported earpiece providing unrestricted audible transfer to take place without sacrificing any ear protection.
- 09 Solid, lightweight, one-piece construction Facemask protects you from paintball impacts.
- 10 Adjustable comfort chinstrap Secures during active play. Keeps the goggle on and refs happy.

DYE Precision, Inc. U.S. Patent #6,886,183 OTHER U.S. and International PATENTS PENDING.

Covered by one or more of the following U.S. Patents, #6,886,183

### **Single Lens**

The Proto Switch™ Goggle System offers the premiere lens in the paintball industry. The tirodial lens gives the ultimate in vertical and horizontal peripheral vision. The lens has

perfect optical clarity and provides 98% UV protection, ensuring you have the best in performance from the first name in paintball, Proto.

#### Thermal lenses

With all the same features as the Switch™ Single Pane Lens, our Switch™ Thermal Lenses include a dual layer to help reduce fogging. Lens fog is caused by air inside your mask being hotter than the air outside your mask. By adding a second lens layer, we create a buffer so the temperature around your lens is more even, there by reducing fogging and allowing you to play with clearer vision. Our thermal lenses also include a unique anti-fog coating to further help reduce fogging.

#### Switch Strap

Replaces the Switch™ strap. Fits all Proto Goggle Systems.

#### Switch Inner Frame

Replaces the Switch™ inner frame. Fits all Proto Goggle Systems.

#### FS outer frame

Fits FS™ Goggle Systems.

#### Pro AXIS Visor

Fits Pro Axis™ Goggle Systems.

#### Pro AXIS Replacement Mask

Fits Pro Axis™ Goggle Systems.

#### switch turbine fan

The Turbine keeps fog and perspiration away so you can deal with the real pressure on the field. Features the Turbo 9 accelerator blade that yields higher airflow volume and operates at a lower RPM, resulting in quieter operation and extended battery life. Features 2 speeds along with forward and reverse. The Switch™ Turbine Fan fits all the Switch™ Goggle Systems.

#### proto jersey

Your jersey is the most visible piece of gear on the field; now enter the 2010 Proto Jersey. A jersey full of design and function to keep you at the top of your game. We've increased the mesh venting overall to cool you down faster. Patent Pending silicone injection improves aim stability and keeps your tank in the sweet spot. Featuring quilted padding on the shoulders, elbows and forearms, the 2010 Proto Jersey keeps you protected. Elastic cuffs feature thumb locks to keep your jersey from riding up when diving into cover. The Proto jersey features no-fade sublimation graphics so the style keeps up with your game.

Available in S, M, L, XL, XXL and XXXL.

## Features

- 01 Elastic stretchable v-neck collar for comfort.
- 02 Patented SILICONE STICKY TACK Stabilizes your gun.
- 03 reinforced double and triple stitching.
- 04 SIDE VENTING Allowing exceptional airflow.
- 05 VENTED NECK Helps heat escape.
- 06 PADDED ELBOWS and forearm.
- 07 Thumb locks Protects palm and backhand.

## CUSTOM Lettering

Let them know who is mowing them down. Our in-house custom graphics department will help you customize your jersey with names, team logos, sponsors and numbers to give you that trick look. You can send your team's artwork in a Vector format EPS file on CD, or e-mail to [jersey@protopaintball.com](mailto:jersey@protopaintball.com). Leave it to us. We make the pro's look good; we can do it for you, too. Turnaround takes about two weeks.

## Proto Pant

Step into a pant that's going to perform, a pant that's going to take a beating, a pant engineered specifically for paintball. The 2010 Proto pant has its foundation in these principles. Lightweight and fast, these pants let you charge the field, while inner leg venting keeps you cool under fire. Reinforced stitching for the longevity of your gear. Padded knees, crotch and yoke for extra protection. Added bonuses like a swab pocket, adjustable cuffs and side Velcro closures to name a few. The sublimated paneling on the sides keeps bright and clean after washing. We spared no ounce of our paintball experience when designing the new Proto Pant. Go out and get dirty, be aggressive, and know that your pants will keep up with you.

Available in XS, S, M, L, XL, XXL.

## Features

- 01 ADJUSTABLE WAIST closures that can expand or shrink four sizes.
- 02 REINFORCED SEAT Extending the life of your pants from sliding.
- 03 PADDED CROTCH Maximum protection for your most valuable items.
- 04 4-way stretch nylon allows for a complete range of motion.
- 05 SWAB POCKET Holds standard flex swabs or single stick swabs at the ready.
- 06 BREATHABLE MESH Comfort and cooling for optimal temperature.
- 07 MICRO-INJECTION LOGOS Add style and graphic flavor.
- 08 INNER THIGH VENTING for Extra circulation to help cool you down faster.
- 09 PADDED KNEES for Protective measures and comfort are all new.

## Proto Gloves

Increase your grip and comfort with the Proto Gloves. Superior comfort and flexibility with enhanced form and control. Full Clarino® palm, Airprene main body and Lycra™ finger gussets offer extreme ventilation. PVC impregnated grip on the palm helps improve grip.

Available in S, M, L, XL.

#### Features

- 01 microinjection closure for easy in and out action.
- 02 compression form Adds protection.
- 03 four way stretchable upper Form fitting for comfort and breath ability.
- 04 Lycra™ gussets. Tight fitting fingers shoot straighter and faster.
- 05 PVC impregnated grip so good they banned it from the NFL®.
- 06 internal Padding For added protection .
- 07 no-seam Clarino® palm Adds comfort and a snug fit.
- 08 non-slip stitch Grip design.
- 09 nylon mesh Padding. breathable material for bounces and ventilation.

#### defender top

Redesigned for 2010, the Defender Performance Top has it all. Front, back, shoulder and side compression padding in places where it counts. Cut-through vented padding, vented underarms and a sweat-absorbing Lycra™ main body to help keep you cool. Microinjection logos for flair and a tight fit for comfortable play. Please do not try to dodge bullets, only paintballs. Thank you. Available in S/M, L/XL, XXL

#### Features

- 01 main body is constructed of a soft 4-way stretch vented poly-blend material. This blended material is the best of both worlds with its sweat wicking properties and the small hole venting for optimal breath ability and comfort.
- 02 The Raised collar is designed with comfort and protection in mind. The throat area has an oversized raised neck with a 1/4-inch sponge foam insert.
- 03 Compressed Soft Flex Protective Panels are placed in the areas that take the most punishment from any aggressive player: the chest, the shoulders, the upper back and even those soft spots like the lower back and the kidneys.
- 04 Optimal movement Soft Flex Protective Panels were designed to stretch and flex with the movement of your body.

#### defender Short

The Defender Slide Shorts feature lightweight, breathable material and a terry cloth lined interior for extra comfort. Absorption wicking material pulls sweat from your body to keep you cool and dry. Removable padded cup helps to protect what's important. With the Defender Slide Shorts you can slide with confidence. Available in sizes S, M, L, XL.

#### Features

- 01 main body is constructed of a 4-way stretch blend material that allows for a glove like fit without restricting any movement. The sweat wicking properties built into this material help keep you dry and cool for added comfort.
- 02 Crotch protection has a removable 3/8-inch closed foam pad to help prevent injury from both paint hits and sliding. It was designed to be soft to offer you great protection, while still allowing you the full range of mobility and comfort.

03 Soft Flex Protective Panels built into the hips of the slide short were designed to flex with the movement of your body. The 1/2 inch compressed sponge foam pads help protect you from hits and aggressive play.

#### Elbow Pads

Redesigned with performance in mind, Proto Elbow Pads keep your arms protected from those game winning dives into the snake. Thick compression formed padding provides long lasting comfort and protection from bone-crushing landings. The airprene main body ensures the pads stay where they are supposed to without overheating or causing discomfort.

Available in S, M, L, XL.

#### Knee Pads

The Proto Knee Pads have the answers you're looking for. Abrasion resistant ballistic nylon can take heavy abuse and still provide total protection. The unique design of the outer layer of padding allows for maximum range of motion without cutting off circulation. Breathable 4-way stretch backing helps keep you cool and keep your pads in place so they stay where they need to be.

Available in S, M, L, XL.

#### Fighter harness

The Proto Fighter Harness is ready to do battle with ultimate effectiveness. A no fuss harness that just works the way you want. It's lightweight and compact style is perfect for anyone wanting a pack that's not heavy on the waist and moves freely. Available in 3+4 or 4+5.

#### features

01 MICRO-INJECTION LOGOS ARE Easy to grip and provides quick access to your pods.

02 ELASTIC EJECTOR LOOPS Springs your pods from your pack to your hand for quick reloading.

03 RUBBERIZED BODY MATERIAL for long lasting durability, prevents sliding to avoid harness twist.

04 Heavily ventilated elastic straps that keep you cool and comfortable.

#### Proto Paintballs

Proto Paintballs are professional grade paintballs that define accuracy. Designed and manufactured to meet a higher standard, Proto Paintballs are for paintball enthusiasts that are serious about their game. Proto paint is extremely round and has a high visibility orange fill as well as excellent mark ability. Proto paint breaks on target, not in your marker. These quality features combined with supreme accuracy make Proto Paint the choice of the pros.

#### Alpha Pods

New for 2010, the Proto Alpha Pod should be your first choice for hauling paint. 150 Ball capacity. No collar for solid construction. Stylish ergonomic designed exterior for

improved grip and function. Locking tab for harness string makes sure your added pods stay locked and loaded. Durable Polypropylene composition. Available in Smoke, Olive, and Blue.

### Backpack

Redesigned for 2010 with stunning new graphics, the Proto Backpack has enough space for a full day of paintball. With a huge full zipper main compartment, just throw in your gear and go. The heavy-duty reinforced ballistic nylon construction and padded gun sling with barrel sock, protects all your goods. Features include expandable mesh side pockets, an interior stash pocket with removable key ring, a laptop pocket, and a lined MP3 player pocket with audio port – because we know how you like your pre-game adrenaline music. It's got that Proto style with embroidered and silk-screened logos. Mask, marker and carabineer not included.

### Gear Bag

Redesigned for 2010 with an upgraded look and improved pocket placement! The king of all paintball gear bags, we've even rolled out the red carpet on this one with a new fold down tool workstation. Your friends will bow down when they see how much this bag carries, 'cause they know you'll have lots of extra gear in there that they can borrow. Heavy-duty industrial roller wheels and a telescopic pullout handle make travel a breeze; roll in and roll out. Also includes a padded shoulder strap, ID pocket, vented zipper side pockets and interior padded gun sleeve with barrel loops.
